HIPAA Implementation: Inpatient Billing Requirements for Sterilization and Hysterectomy

The September *Medi-Cal Update* instructed Inpatient providers to use ICD-9-CM Volume 3 procedure codes instead of CPT-4 and/or HCPCS procedure codes effective for dates of service on or after September 22, 2003. This policy extends to sterilization and hysterectomy services.

A code correlation guide that lists sterilization and hysterectomy codes exclusively is provided below and an identical chart is provided in the *Hysterectomy* and *Sterilization* sections (Part 2), respectively, for reference.

Note: All providers other than Inpatient will continue using CPT-4 and/or HCPCS procedure codes.

Sterilization and hysterectomy services still require a signed consent form. Claims submitted with any of the following procedure codes that are not accompanied by the appropriate consent form will be denied.

Sterilization Services

Effective for dates of service on or after September 22, 2003, claims submitted by Inpatient providers for sterilization services require the following ICD-9-CM Volume 3 procedure codes:
